

# AMG-III: SAFETY, ENVIRONMENT, ENERGY AND QUALITY POLICY

The purpose of FORESA INDUSTRIAS QUÍMICAS DEL NOROESTE is to **develop and manufacture chemical products** and offer services that satisfy market needs in a sustainable manner. This is achieved with **minimum environmental impact and optimized organizational energy performance** within a safe and diverse work environment that promotes the contribution and development of individuals.

Aware of the importance of **quality management, environmental protection, energy management, and occupational health and safety**, a management system has been implemented. This system demonstrates our commitment to continuous improvement and adaptation to changes.

The Management of FORESA develops and establishes the **Safety, Environment, Energy, and Quality Policy**, defined as the set of guidelines and general objectives guiding its actions regarding the protection of people, the environment, energy efficiency, and quality of customer service. This is carried out through the following commitments:

- To comply with and exceed all legal and regulatory requirements, assuming, among others, **ambitious commitments in terms of health and safety, prevention of major accidents, environment, energy, and quality.**
- To be a **responsible member of society, committed to the principles of protecting the health and safety of our employees and partners**, and creating a work environment that promotes both professional and personal development, the protection of the environment, the efficient use of energy, and the technological commitment applied to our processes, products, and services.
- To invest in research and development with the purpose of offering **more efficient and environmentally friendly products**, as well as providing technical solutions in accordance with the requirements, needs, expectations, and specifications established by stakeholders.
- To foster **continuous improvement** through the establishment of objectives and targets, and the systematic and periodic evaluation of the Management System.
- To promote **staff training at all levels** to consolidate a high degree of sensitivity, responsibility, and awareness regarding the need to protect and preserve the environment, energy efficiency, health and safety, and quality in all company activities.
- To work towards **minimizing impact in all stages** of our activities, products, and services, taking into account life cycle analysis, sustainability, and the circular economy.

- To consult and involve workers**, collaborating companies, and suppliers in the management of health and safety, environment, energy, and quality.
- To continuously promote prevention and risk analysis** activities, and to adopt the necessary measures to mitigate effects and consequences on people, the environment, and assets.
- To maintain both internal and external **communication channels** based on transparency criteria, establishing a cooperative relationship with authorities and an open dialogue with interested parties and the public.
- To evaluate and consider the effects on safety, environment, energy performance, and product-service quality in new projects or industrial developments, **introducing the necessary systems to minimize impact on people, the environment, facilities, and quality.**
- To support the procurement and design of energy-efficient** products and services to improve energy performance.
- To provide safe and healthy working conditions** for the prevention of work-related injury and occupational diseases.

FORESA Management approves and reviews this policy, which serves as the foundation for developing safety, environment, energy, and quality objectives to ensure continued suitability amidst changing circumstances. Furthermore, Management supports and promotes the Guidelines and Procedures stemming from the Management Manual and commits to providing the necessary means and resources to achieve the provisions of this Policy, ensuring its update, understanding, and dissemination at all levels.
